### Abstract

The article offers scientific definition of sin and then explains how sinning leads to diseases. The realization that you didn't do right (sinned) leads to negative emotions, which make the aura (Spirit) to spin counterclockwise and lose energy. The lost energy of the aura (Spirit) decreases the body energy and leads to diseases of the body – acute and chronic.

**Keywords:** Acute diseases and sin; Chronic diseases and sin; Scientific definition of sin; Negative emotions and sin

### Introduction

In the Christian Bible, John (the Beloved) - the beloved disciple of Jesus Christ – said that Jesus said to an invalid of 38 years after healing him: “Take up you mat and walk” and he did. Later Jesus found this man at the temple and said to him: “See, you are well again. Stop sinning or something worse can happen to you” (John 5:14). It seems that there is a direct correlation between diseases and sins, but we must define first what is sin. To define sin, we must first accept the fact that we are a material body and Spirit, which brings life to the body. Indeed, when a person dies and the Spirit leaves, the lifeless material body is an empty shell (good for noting) that needs to be discarded. Look at the empty shell! And our science and medicine claim that we are only a material body – we are only this empty shell. Thus, our science and medicine need to accept the fact that we are a material body and emotional Spirit that makes us emotional. If we don't accept the obvious fact that we are body and emotional Spirit, we don't have the right to name ourselves “Hu-mans”, which means “men of the Creator God Hu”. The Hindu Yogi sang “Hu” to get united with the Creator God Hu [1].

### The Quantum Computer in the Subconscious

To give us freedom of choice, the Creator God put everything related to the Spirit in the Subconscious. Measuring the brain activity with electroencephalograms (EEGs) show that our sleep is a constant switch between light sleep (when the Conscious is active and EEG registers brain waves) and deep sleep when the Subconscious is active and only galvanic response is measured, which is specific for emotions. This means that the emotional Spirit is in the Subconscious and its presence in the body makes us emotional. Indeed, I started my journey to the Spirit by photographing the aura with Kirlian photography, which uses high frequency electric field to multiply the photons of the weak aura and make it photographable. I found that positive emotions make the aura brighter, while negative emotions make the aura dimmer. Since we claim we are in high

Spirit when we experience positive emotions and we claim we are in low Spirit when we experience negative emotions, I concluded that the weak aura must be our Spirit. Then I found that the ancient Jewish Cabala was teaching to high priests that the aura is our Spirit.

Thus, the Creator God put everything related to the Spirit in the Subconscious to give us freedom of choice – the biggest gift of the Creator to us. We are not consciously aware what else is in the Subconscious. However, hypnotists, who put the Conscious to sleep to access the Subconscious, found with surprise that hypnotized individuals (with sleeping Conscious) calculate thousands of times faster. This meant that in the Subconscious we had more powerful computer than our conscious computer. Since everything related to the Spirit is in the Subconscious, the fast computer in the Subconscious is probably a Quantum Computer working with the waves of the Spirit [2]. This Quantum Computer is expected to be the source of our subconscious intuition and our intuitive creativity [3].

### Definition of Sin

In the hardware of the Quantum Computer working with the waves of the Spirit, the Creator God put the spiritual rules we need to follow – we are his creations and we need to do our best to be like our Creator God – loving, forgiving, and helping others. If we don't do this, we sin... and if we sin, we have a prize to pay for this [5]. The Spirit that is in the Subconscious makes us emotional, and each time we do things that are not right, the hardware of the Subconscious Quantum Computer is the Judge telling us that we didn't do right [5]. This is negative emotion, and my measurements of the Spirit (seen as aura) showed that negative emotions destroy the energy balance of the body and lead to a disease of genetically inherited weak organ (**Figure 1**) [5].

### Diseases and Sin & Diseases and Emotions

Thus, we have a strong judge in the Subconscious. If we do

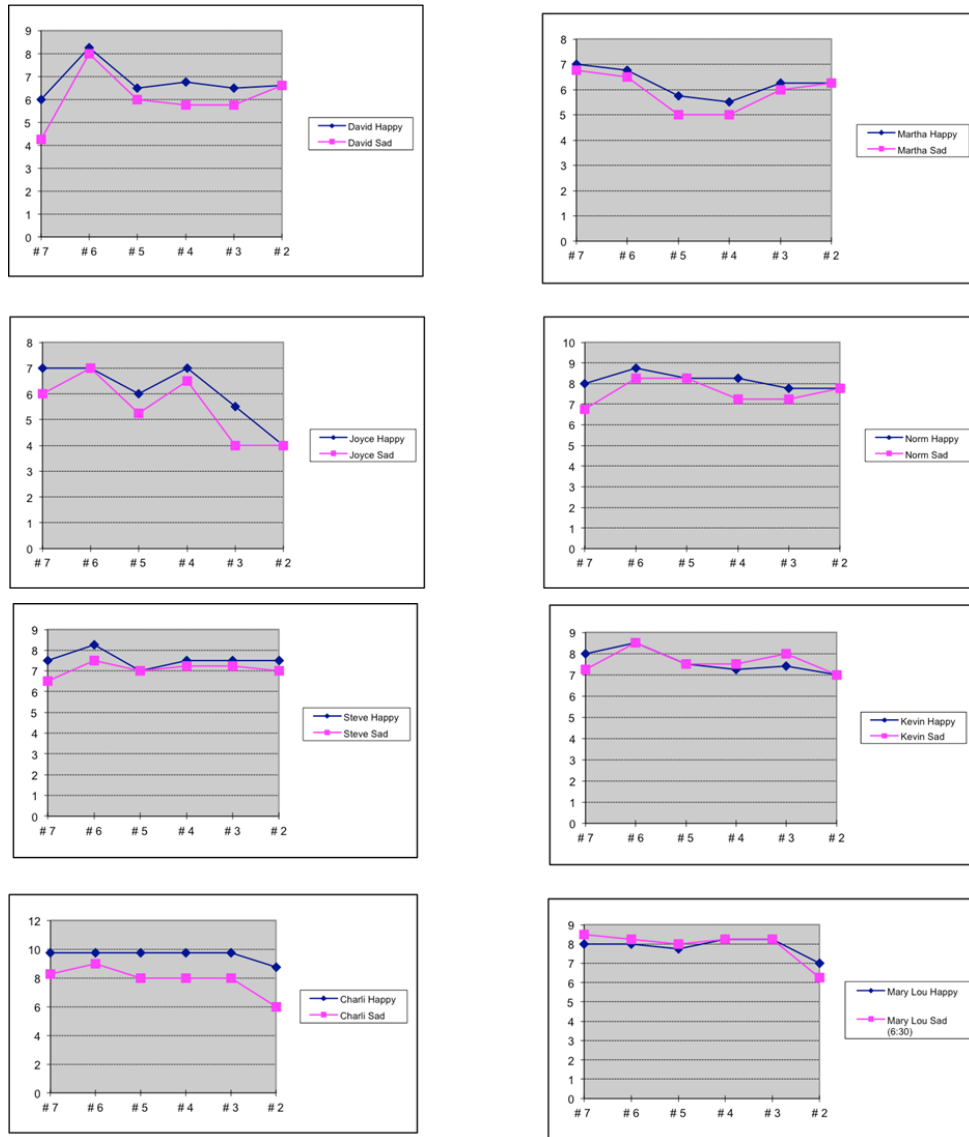

Figure 1

something that the hardware of the subconscious Quantum Computer is telling us was not right, we experience negative emotions. which through the emotional Spirit, which rules and regulates everything in the body, effect negatively our health and wellbeing (Figure 1) [4,5]. Just the thought that we didn't do right evoke negative emotion, which (according to my measurements) (Figure 1) is enough to influence negatively the functioning of the body and lead with time (after many trespasses (sins)) to a chronic disease of genetically inherited weak organ.

“Chronic” means “slow”. Pulse diagnosis, used in Eastern Asia to diagnose oncoming chronic diseases, shows that it takes 5 to 7 years for a chronic disease to be fully established with all its symptoms. Since pulse diagnosis measure the phase shifts (delays) in the pulse caused by stress (negative emotions) and each time you realize you didn't do right (you sinned) you experience negative emotion, obviously it takes more than one sin to get a chronic disease [6]. However, sin is not only at the bottom of all chronic diseases, sin facilitates acute diseases as well.

Each time the hardware of the Quantum Computer in the Subconscious (which works with the waves of the Spirit and is the judge of the Spirit in the Subconscious) tells you that you didn't do right (you sinned), this evokes negative emotions.

Shkatov in Russia found with his patented torsimeter that negative emotions make our aura (Spirit) to spin counterclockwise. Since nonlinear physics teaches those anti-vortices spin counterclockwise and lose energy, at negative emotions when you realize that you didn't do right (you sinned), your body loses energy and if there is a germ (virus or bacteria) it wins over your body and you become sick.

**Conclusion**

Thus, in this article I explained the connection between sin and disease. The disease comes at the realization that you didn't do right (you sinned), which brings negative emotions that: 1/ make the aura (Spirit) to spin counterclockwise and loose energy, which decreases your body energy making it more vulnerable to germs; 2/ a multitude of realizations that you sinned will bring multiple times negative emotions, which would lead to multiple delays (phase shifts) in the rhythmic functioning of the body - with time this would lead to a chronic disease.
